

# Paraphrasing

To **paraphrase** means to rewrite something in your own words.

- 1 Use synonyms to replace words
- 2 Rearrange the order of words and ideas
- 3 Make sure that the key facts (names, dates, titles etc.) are not changed
- 4 Re-read the original and your paraphrase to make sure it communicates the same ideas.

## Original

Gemstones are natural treasures that captivate the human imagination with their exquisite beauty and timeless allure. These precious and semi-precious stones, formed deep within the Earth's crust, showcase a kaleidoscope of colors, textures, and patterns. From the radiant brilliance of diamonds to the rich hues of sapphires, emeralds, and rubies, each gemstone possesses unique characteristics that make it a distinct work of art. Gemstones continue to be cherished as symbols of love, wealth, and status, while their geological rarity adds to their intrinsic value. Whether as centerpieces in jewelry or prized specimens in mineral collections, gemstones endure as captivating expressions of Earth's geological wonders.

## Paraphrase

From deep within the Earth's crust, gemstones come in a huge variety of colours and textures. Bright diamonds and colourful sapphires, emeralds and rubies captivate the imagination with their radiant and timeless beauty. Gemstones are not only rare but also unique, making them valuable symbols of wealth, status and love. Is that stone a centrepiece for jewellery? How about a prize specimen in a mineral collection? These distinctive works of art continue to be cherished as expressions of Earth's geological wonders.
